About the Centre

The Centre for China Urban and Regional Studies (CURS or the Centre), currently housed at the Department of Geography of Hong Kong Baptist University (HKBU or the University), was established on 1 July 2001. CURS was founded with a major donation from Heung To Educational Fund secured by Professor C F Ng, President and Vice Chancellor of the University. CURS aims at conducting high quality research and cultivating academic exchange on China's urban and regional developmental issues.

Research Fellows of CURS include faculty members of the University who come from a variety of disciplinary backgrounds but who share a common interest in urban and regional research on China. It is the objective of CURS to further enhance Hong Kong's status as an academic hub for the study of China's cities and regions. Research conducted by CURS's research fellows covers a wide range of intellectual and policy-oriented domains: economic development, industry and finance, housing studies, transportation, land-use planning, social problems and social service provision, cultural landscape, inter-regional and rural-urban migration, social stratification, quality of life, and urban modelling, including the application of geographic information systems and remote sensing techniques in the study of urban and regional change.

Since the founding of the Centre, CURS has pioneered micro-analysis of urban housing and residential change in China, and has developed close working relations with research institutions in Mainland China and elsewhere, such as the Centre for Urban and Regional Studies at Sun Yat-sen University, Guangzhou, the Urban China Research Network of the State University of New York at Albany, USA, the Urban China Research International Network of Cardiff University, UK, the Spatial Structure in Social Sciences at Brown University, USA, and the Xinjiang Institute of Geography and Ecology, Urumqi.

Conference Organizing Committee:

Chairman: Si-ming Li, Director of CURS

Members: Donggen Wang, Associate Director of CURS
Wing-Shing Tang, CURS Occasional Paper Editor
Cammy Wu, Research Assistant, CURS
Quan Hou, Research Assistant, CURS

Acknowledgements

The organizing committee would like to extend our sincere thanks to our co-organizers and sponsors, without their generous contributions and support the holding of this conference would not be possible. We are also indebted to our three keynote speakers, who have contributed so much to China urban research, and to the paper presenters and other conference participants, whose overwhelming response to our call for paper and their insightful analyses of China's urban land and housing is a most gratifying gift to us in this season of greetings.
